The Charité – Universitätsmedizin Berlin, invites applications for the following position, located at the CharitéCentrum 14 for cancer medicine, commencing as soon as possible:

**Full Professorship for hematology and oncology with focus on lymphoma/multiple myeloma (W3 tenured)**
Reference number: Prof. 504/2017

The successful candidate will be responsible for the area lymphoma/multiple myeloma in research, teaching and medical service across all sites of the department and clinic for hematology, oncology and tumor medicine. In general, employment takes place according to § 102 paragraph 5 of the Berlin Higher Education Act (BerlHG).

As one of the strategic focus areas of the Charité, hematology/oncology is of particular importance to research and teaching as well as medical service and continuing education. The Charité strives to establish an integrated and cooperative structure for medical service and research across all sites. Therefore, a department structure with a rotating chair position and an integrated budget responsibility will be implemented.

We seek to fill this position with an outstanding, nationally and internationally recognized, team-oriented scientist and clinician, who fulfills all scientific and clinical activities at high international standards and creates a forward-looking profile for the field with a modern concept for structure as well as scientific and clinical content.

Candidates are expected to have a proven track record in research and third-party funding in the field of lymphoma/multiple myeloma, preferably with a translational approach. Additional prerequisites are didactic excellence, a strong motivation and undisputable commitment to undergraduate and graduate student education within Charité’s model-curriculum in medicine as well as other programs at the Charité. Management experience in the area of university medicine is relevant.

Close research collaborations in the field of hematology/oncology, in particular with the Charité Comprehensive Cancer Center (CCCC), an active role within the German Cancer Consortium (DKTK), a close cooperation with the Max-Delbrück-Centrum (MDC) under the roof of the Berlin Institute of Health (BIH) with the objective of further developing the scientific program and acquiring third-party funding are expected. Furthermore, the integration in existing research networks like the Berlin School of Integrative Oncology (BSIO) and the Molecular Cancer Research Center (MKFZ) as well as the participation in relevant research focus areas and research collaborations of the Charité (www.charite.de) and beyond, such as cooperation with other institutions in Berlin and Brandenburg are expected.
According to § 100 BerlHG a junior professorship or a postdoctoral thesis (Habilitation), or equivalent scientific and teaching achievements qualify for the advertised position.

Duties and responsibilities within the field of patient care, including treatment of patients with private insurance, will be subject to a separate employment contract with the Charité – Universitätsmedizin Berlin. This includes a performance-based salary consisting of fixed and variable components.

The Charité is committed to increasing the proportion of women among the scientific staff, therefore we strongly encourage women to apply. Women will be given preference over equally qualified men (within the framework of the legal possibilities). Candidates with immigrant background who fulfill the necessary requirements are explicitly encouraged to apply. Equally qualified applicants with disabilities will be given preference. Charité is certified by the audit “family-friendly university” and a member of the “Dual Career Network Berlin” (www.dualcareer-berlin.de).

Written applications according to the format specified on https://career.charite.de/am/calls/application_notes.pdf should be submitted by September 28th, 2017 at https://career.charite.de.
